

SCHOOL	NATURAL SCIENCES		
ACADEMIC UNIT	BIOLOGY		
LEVEL OF STUDIES	POSTGRADUATE		
COURSE CODE	GBIO_OKYA2	SEMESTER	1 st
COURSE TITLE	Biodiversity Assessment and biomonitoring of species and habitats		
INDEPENDENT TEACHING ACTIVITIES	WEEKLY TEACHING HOURS	CREDITS	
Lectures, Laboratory Exercises	13	8	
COURSE TYPE	1) Specialised general knowledge, 2) skills development		
PREREQUISITE COURSES	NO. Formally, there are no prerequisite courses. Nevertheless, a basic knowledge of General Biology, Botany and Zoology, Mapping of species and habitats is recommended.		
LANGUAGE OF INSTRUCTION and EXAMINATIONS	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	NO		
URL	https://eclass.upatras.gr/courses/BIO334/		
Learning outcomes			
At the end of the course, the student will be able to: 1) understand the basic concepts of surveillance, monitoring of species and habitat types in the context of implementing the relevant European Union Directives, 2) have the knowledge of the methodologies for implementing monitoring plans for species and habitats in different types of ecosystems; 3) understand the methods of assessing the conservation status of species and habitat and collect data in the field based on standardized protocols for the assessment of pressures/threats and structures and functions regarding habitat types, as well as for the assessment of population parameters and pressures/threats for plant and animal species, 4) strengthen his/her efficiency to compile information in a coherent system/unit.			
General Competences			
At the end of the course, the student will have developed the following skills: 1) Ability to demonstrate knowledge and understanding of essential data, concepts and theories of monitoring and assessment of species' and habitats' conservation status, 2) Ability to apply this knowledge and understanding of the results of the assessment of conservation status and their link to management issues for the conservation of species and habitats within the targeted integrated nature conservation in protected areas 3) Ability to collaborate with others on interdisciplinary environmental issues; 4) Research and study skills needed for continuous professional development.			
Teaching and Learning methods-Evaluation			
DELIVERY	Face to Face		
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY	(1) Use of computers and special software during the course by the instructors and the students. (2) Support of educational procedure with use of the e-class electronic platform.		
TEACHING METHODS	Activity	Semester workload	
	Lectures and Laboratory Exercises	39	
	Literature study	55	
	Writing project	55	
	Home study	51	
	Course total (25 hours per one ECT)	200	
STUDENT PERFORMANCE EVALUATION	Elaboration & Presentation of Laboratory Exercises (at the semester's end) Grading scale: 1-10. Passing grade: 5 Grading: 3 correspond to ECTS grade F. Grade 4 corresponds to ECTS grade FX. Passing grades correspond to ECTS grades as follows: 5=E, 6=D, 7=C, 8=B, 9=A
